The Future of Addiction Healthcare
Lies in Our Data

FoRSE®
NAATP FOUNDATION
for Recovery Science and Education

Examine your treatment outcomes

Receive free data analysis report

**Participate in industry leading research**

Compare your outcomes with other treatment providers

Serve your patients more effectively

Addiction and recovery professionals are urgently called upon to demonstrate quality and effectiveness of care. The NAATP Foundation for Recovery Science and Education (FoRSE) offers a simple process for providers to share a limited set of **de-identified patient data** into a centralized database through an Application Programming Interface (API). FoRSE uses this data to create **free, confidential benchmarking reports** for providers, comparing their data to aggregated data from treatment centers nationwide. This is a **first-of-its kind** national effort to demonstrate the value of addiction healthcare and **expand the reach of recovery** to more who need it.
